Personal Profile

I am a proactive **Computer Systems Engineering** graduate with a strong passion for data and its practical application in driving informed decision-making. My experience spans multiple industries, including Customer Service, Outdoor Pursuits, and IT, enabling me to develop a versatile and adaptable professional skill set. Through these roles, I have cultivated strong communication and interpersonal skills, collaborating effectively with diverse stakeholders. I am equally comfortable working independently, demonstrating initiative, accountability, and a structured, analytical approach to problem-solving.

I am currently undertaking an 8-week intensive **Data Skills Bootcamp** with Leep Talent to further strengthen my technical foundations and industry readiness. Alongside formal training, I actively consolidate my learning through practical projects, which are showcased on my LinkedIn and GitHub as part of my growing data portfolio.

My career objective is to secure a **Junior Data Technician** or **Data Apprenticeship** role where I can apply my technical knowledge, expand my practical experience, and continue developing within the data field during the early stages of my professional journey.

Key Skills

Technical Skills

- SQL, Python
- Azure
- Tableau, Power BI
- Excel
- Cyber Security Fundamentals: Understanding threat actors, Privacy and data protection laws (GDPR) and awareness of Social Engineering concepts.
- Data Structures & Algorithms - key analytical skills and ability to implement algorithms for efficient processing of data structures.

Soft Skills

- Critical Thinking
- Excellent communication skills
- Strong presentation skills
- Team Player
- Eye for detail
- Keen to CPD

Training and Education

01/26-03/26

LeepTalent, London

- Data, Big Data, Data Structures, Data Architecture & Governance
- Data Analysis using MS Excel
- Introduction to Data Visualisation with **MS Excel, Tableau and Power BI**
- Introduction to Databases - Azure & **SQL** Assignments
- Azure Fundamentals - Module 1 - core data concepts - **SAAS, PAAS, IAAS, Cloud**
- Azure Fundamentals - Module 2 - relational data in **Azure** (DB)
- Azure Fundamentals - Module 3 - Non-relational data in Azure - **Cosmos** (DB), JSON
- Azure Fundamentals - Module 4 - **MS Fabric**
- Data Analysis via **Python** programming - Utilising Pandas, Matplotlib & Seaborn

University of East Anglia, Norwich

Computer Systems Engineering with a Foundation year

Databases, Programming, Cyber Security, Machine Learning
Python, SQL, C++, Java

“Designing interfaces for mental health,
Integrating accessibility throughout” – Researching and creating a
sample UI within Python

City College, Norwich

Access to Engineering (Pass), Advanced Apprentice in IT (Pass),
Advanced Diploma in IT (Pass), GCSE Maths (4), GCSE English (5).

Hobart High School, Loddon, Norfolk

Science, History, Media Studies

11/25-12/25	Sales Assistant Jarrollds, Norwich
• Delivered high-quality face-to-face customer service in a busy retail environment, supporting a wide range of customer queries and questions. • Handled cash confidently, including till use and end-of-day cash reconciliation. • Assisting with stock replenishment and moving stock whilst adhering to a high level of health and safety procedures and processes.	

Customer Service Expert

- Delivered high-quality, frontline customer service in a fast-paced contact centre environment, supporting a wide range of customer needs and concerns.
- Demonstrated strong knowledge of business processes, including handling complaints in line with FCA regulations and company policy.
- Provided product information and technical support for home insurance policies, ensuring clarity and accuracy in communication.
- Maintain strict adherence to Data Protection and GDPR policies to safeguard customer information.
- Collaborated with team members to maintain service standards and improve the overall customer experience.

Customer Service Assistant

- Provided face-to-face support to customers at help desks and across the retail floor, assisting with queries, directions, and general support.
- Handled cash confidently, including till use and end-of-day cash reconciliation.
- Ensured a safe and welcoming environment for all shoppers, adhering to health and safety procedures.
- Assisted with store events and promotions, enhancing the customer shopping experience.

I also have administrative experience (with an electrical contractor), further retail experience, and stocktake/auditing (for an auditing firm).

Outside of my professional development, I am a passionate dodgeball player, having competed at both university and National League level. Playing competitive sport has strengthened my teamwork, strategic thinking, performance analysis, and ability to make quick, data-informed decisions under pressure.

I have a strong interest in sport more broadly, often engaging with performance statistics and trends. I also enjoy attending live music events and festivals, collecting, and playing board games that involve strategic planning and probabilistic thinking, and travelling to explore new environments. These interests reflect my curiosity, analytical mindset, and appreciation for patterns, systems, and structured problem-solving beyond the workplace.

Additional Info:

- Currently working towards my PL300 certification from Microsoft and have completed a course on UX design.
- Hold a valid UK driving licence
- Right to work in the UK
- Available for an interview with immediate effect
